Open to remote positions in Spain and internationally

PROFESSIONAL SUMMARY

Android developer with mobile engineering experience since 2021 across banking and public-sector projects. Experience acting as the Android technical point of contact on projects and coordinating multidisciplinary mobile teams, architecture decisions, and cross-functional coordination, mentoring junior and mid-level developers, production support, and direct client communication. Also contributes to GitHub migration, repository security, CI/CD, internal Android/KMP initiatives, technical proposals, and candidate interviews.

CORE SKILLS

Android and mobile: Android, Kotlin, Kotlin Multiplatform (internal repository contribution), Java, Ionic, and Capacitor.

Architecture and delivery: Mobile architecture, GitHub, CI/CD, repository security, production deployments, and production support.

Coordination and mentoring: Android technical point of contact on projects, junior/mid mentoring, Android/iOS/backend coordination, client communication, proposals, and interviews.

Additional experience: JavaScript, Angular, Node.js, Express.js, MEAN/MEVN, MongoDB, MySQL, C#, SQL Server/T-SQL, and Postman.

PROFESSIONAL EXPERIENCE

HIBERUS TECNOLOGÍAS DE LA INFORMACIÓN S.L.

Kotlin Mobile Developer | 2021 - Present

Banking and production

- Act as the Android technical point of contact on banking projects, coordinating the Android workstream and representing it in cross-functional meetings.
- Mentor and support junior and mid-level developers with blockers, troubleshooting, and implementation decisions.
- Support the investigation and resolution of production issues with the teams involved.

Public sector and client coordination

- Coordinated mobile delivery for a public-sector project with an 8-person team (4 Android and 4 iOS) alongside backend engineers.
- Maintained direct client communication to align requirements, product evolution, and technical decisions.
- Proposed application architecture, technical improvements, and structural changes tailored to the project.

Department-wide initiatives

- Contributed to the migration to GitHub and to repository security measures supporting CI/CD and production deployment workflows.
- Supported colleagues adopting the new repositories and delivery processes.
- Contributed to internal engineering initiatives and the company's Android/KMP repository.
- Participated in technical client proposals and interviewed candidates for mobile engineering positions.
- Earlier Hiberus assignments included Kotlin mobile, Ionic/Capacitor, and JavaScript full-stack development with MEAN/MEVN.

EARLIER EXPERIENCE

IDEA CONSULTING S.L.

Junior C# Developer | 2021

- Application and database development using C#, Microsoft SQL Server, and T-SQL.

SOLUCIONES EN DESARROLLO SOFTWARE S.L.

IT Support / Systems Technician | 2019 - 2021

- Help desk support, computer virtualization, data recovery, domain administration, and backup management.

CERTIFICATIONS AND COURSES

- AI Expert | DevExpert.io - IA para Desarrolladores | June 2026
- Compose Expert | DevExpert.io - IA para Desarrolladores | May 2026
- Kotlin Expert | DevExpert.io - IA para Desarrolladores | April 2026
- Android Programming from Scratch with Java - Udemy, 2021
- Ionic: iOS, Android, and Web Apps with Ionic and Angular - Udemy, 2021
- Angular: From Zero to Expert - Udemy, 2021
- Server and Remote Desktop Virtualization with VMware - Core Networks S.L., 2018

EDUCATION

Advanced Vocational Diploma in Multiplatform Application Development (DAM)

C.P.I.F.P. Los Enlaces | 2019 - 2021

Advanced Vocational Diploma in Networked Computer Systems Administration (ASIR)

Academia Marco | 2016 - 2018

Full-Stack Web Development Programme - MEAN Stack

Hiberus University / PUE | 2021
